### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claim 2 is the inclusion of a control means for controlling a ratio of a period wherein an image bearing member is moved without being charged by a charging means, to a period wherein the image bearing member is moved while being charged by the charging means, so that the ratio is equal to or greater than a predetermined value. The control means calculates the ratio in accordance with a predetermined number of sheets subjected to image forming. This is found in all of claim 2, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 3-5 is the inclusion of a control means for controlling a ratio of a period wherein an image bearing member is moved without being charged by a charging means, to a period wherein the image bearing member is moved while being charged by the charging means, so that the ratio is equal to or greater than a predetermined value. When the ratio is smaller than a predetermined value, the control means increases the period wherein the image bearing member is moved without being charged by the charging means, so that the ratio is equal to or greater than the predetermined value. This is found in all of claims 3-5, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sato discloses art in charging devices. Watanabe et al. discloses a photoconductive drum rotating at a speed considerably lower than the rotating speed for a copying mode after completion of a copying cycle, and is stopped after the passage of a predetermined time.
